DECISION NOTICE

Application (full) for planning permission.

Town and Country Planning Act 1990

Reference:	22/01677/FUL
Proposal:	Two new houses attached to existing house plus single storey rear extension
Address:	201 Northridge Way Hemel Hempstead Hertfordshire HP1 2AU

Your application received 24th May 2022 and registered on 8th June 2022 has been **GRANTED** subject to the conditions overleaf.

Head of Development Management
Dacorum Borough Council

Condition(s) and Reason(s):

1. The development hereby permitted shall begin before the expiration of three years from the date of this permission.

Reason: To comply with the requirements of Section 91 (1) of the Town and Country Planning Act 1990, as amended by Section 51 (1) of the Planning and Compulsory Purchase Act 2004.

2. The materials to be used in the construction of the external surfaces of the development hereby permitted shall match the existing building in terms of size, colour and texture.

Reason: To make sure that the appearance of the building is suitable and that it contributes to the character of the area in accordance with Policies CS11 and CS12 of the Dacorum Borough Core Strategy (2013).

3. Prior to the first use of the development hereby permitted the vehicular access arrangements shall be completed and thereafter retained as shown on drawing number PL001 A in accordance with details/specifications submitted to and approved in writing by the Local Planning Authority in consultation with the highway authority. Prior to use appropriate arrangements shall be made for surface water to be intercepted and disposed of separately so that it does not discharge from or onto the highway carriageway.

Reason: To ensure satisfactory access into the site and avoid carriage of extraneous material or surface water from or onto the highway in accordance with Policy 5 of Hertfordshire's Local Transport Plan (adopted 2018), Dacorum Core Strategy policies CS8, CS12, CS29 and CS31 and the NPPF.

4. The protection measures outlined in the submitted Arboricultural Impact Assessment and Method Statement (including the tree protection (ATS-TPP-19546) plan) shall be carried out according to the approved details and thereafter retained until completion of the development.

Reason: In order to ensure that damage does not occur to trees and hedges during building operations in accordance with saved Policy 99 of the Dacorum Borough Local Plan (2004), Policy CS12 of the Dacorum Borough Core Strategy (2013) and the National Planning Policy Framework (2021).

5. Notwithstanding the provisions of the Town and Country Planning (General Permitted Development) Order 2015 (as amended) (or any Order amending or re-enacting that Order with or without modification) no development falling within the following classes of the Order shall be carried out without the prior written approval of the Local Planning Authority:

AA and B;.

Reason: To enable the Local Planning Authority to retain control over the development in the interests of safeguarding the residential and visual amenity of the locality in accordance with Policy CS12 of the Dacorum

Borough Core Strategy (2013) and Paragraph 130 of the National Planning Policy Framework (2021)

6. Prior to completion or first occupation of the development hereby approved, whichever is the sooner; a tree no less 12-14cm in girth shall be planted within the application site. Should this tree be found to be dead, dying, severely damaged or diseased within five years of the completion of the development it shall be replaced in the next planting season by a specimen of similar size and species in the first suitable planting season.

Reason: In the interests of sustainable development consistent with Core Strategy policy CS29 and the NPPF.

7. The development hereby permitted shall be carried out in accordance with the following approved plans/documents:

PL001A;
PL002;
PL002A;
PL003;
PL004;
PL005;
PL006;

Reason: For the avoidance of doubt and in the interests of proper planning.

Informatives:

1. Planning permission has been granted for this proposal. The Council acted pro-actively through positive engagement with the applicant during the determination process which led to improvements to the scheme. The Council has therefore acted pro-actively in line with the requirements of the Framework (paragraph 38) and in accordance with the Town and Country Planning (Development Management Procedure) (England) (Amendment No. 2) Order 2015.
2. Biodiversity enhancements could be incorporated into the development proposal. These could be in form of bat and bird boxes in trees, integrated bat roost units (bricks and tubes) in buildings, specific nest boxes for swifts, swallows and martins, refuge habitats (e.g. log piles, hibernacula) for reptiles at the site boundaries, etc. These should be considered at an early stage to avoid potential conflict with any external lighting plans. Advice on type and location of habitat structures should be sought from an ecologist.
3. In accordance with the Councils adopted criteria, all noisy works associated with site demolition, site preparation and construction works shall be limited to the following hours - 07:30 to 17:30 on Monday to Friday, 08:00 to 13:00 on Saturday and no works are permitted at any time on Sundays or bank holidays.

4. Dust from operations on the site should be minimised by spraying with water or carrying out of other such works that may be necessary to suppress dust. Visual monitoring of dust is to be carried out continuously and Best Practical Means (BPM) should be used at all times. The Applicant is advised to consider the control of dust and emissions from construction and demolition Best Practice Guidance, produced in partnership by the Greater London Authority and London Councils.
5. Under no circumstances should waste produced from the development be incinerated on site. This includes but is not limited to pallet stretch wrap, used bulk bags, building materials, product of demolition and so on. Suitable waste management should be in place to reduce, reuse, recover or recycle waste product on site, or dispose of appropriately.
6. As an authority we are looking for all development to support sustainable travel and air quality improvements as required by the NPPF. We are looking to minimise the cumulative impact on local air quality that ongoing development has, rather than looking at significance. This is also being encouraged by DEFRA.

As a result as part of the planning application I would recommend that the applicant be asked to propose what measures they can take as part of this new development, to support sustainable travel and air quality improvements. These measures may be conditioned through the planning consent if the proposals are acceptable.

A key theme of the NPPF is that developments should enable future occupiers to make "green" vehicle choices and (paragraph 35) "incorporates facilities for charging plug-in and other ultra-low emission vehicles". Therefore an electric vehicle recharging provision rate of 1 vehicle charging point per 10 spaces (unallocated parking) is expected. To prepare for increased demand in future years, appropriate cable provision should be included in the scheme design and development, in agreement with the local authority.

Please note that with regard to EV charging for residential units with dedicated parking, we are not talking about physical charging points in all units but the capacity to install one. The cost of installing appropriate trunking/ducting and a dedicated fuse at the point of build is miniscule, compared to the cost of retrofitting an EV charging unit after the fact, without the relevant base work in place.

In addition, mitigation in regards to NOx emissions should be addressed in that all gas fired boilers to meet a minimum standard of 40 mg NOx/Kwh or consideration of alternative heat sources.

7. AN1) Works within the highway (section 278): The applicant is advised that in order to comply with this permission it will be necessary for the developer of the site to enter into an agreement with Hertfordshire County Council as Highway Authority under Section 278 of the Highways Act 1980 to

ensure the satisfactory completion of the access and associated road improvements. The construction of such works must be undertaken to the satisfaction and specification of the Highway Authority, and by a contractor who is authorised to work in the public highway. Before works commence the applicant will need to apply to the Highway Authority to obtain their permission and requirements. Further information is available via the County Council website at: <https://www.hertfordshire.gov.uk/services/highways-roads-and-pavements/business-and-developer-information/development-management/highways-development-management.aspx> or by telephoning 0300 1234047.

AN 2) Storage of materials: The applicant is advised that the storage of materials associated with the construction of this development should be provided within the site on land which is not public highway, and the use of such areas must not interfere with the public highway. If this is not possible, authorisation should be sought from the Highway Authority before construction works commence. Further information is available via the County Council website at: <https://www.hertfordshire.gov.uk/services/highways-roads-and-pavements/business-and-developer-information/business-licences/business-licences.aspx> or by telephoning 0300 1234047.

AN 3) Obstruction of highway: It is an offence under section 137 of the Highways Act 1980 for any person, without lawful authority or excuse, in any way to wilfully obstruct the free passage along a highway or public right of way. If this development is likely to result in the public highway or public right of way network becoming routinely blocked (fully or partly) the applicant must contact the Highway Authority to obtain their permission and requirements before construction works commence. Further information is available via the County Council website at: <https://www.hertfordshire.gov.uk/services/highways-roads-and-pavements/business-and-developer-information/business-licences/business-licences.aspx> or by telephoning 0300 1234047.

AN 4) Debris and deposits on the highway: It is an offence under section 148 of the Highways Act 1980 to deposit compost, dung or other material for dressing land, or any rubbish on a made up carriageway, or any or other debris on a highway to the interruption of any highway user. Section 149

of the same Act gives the Highway Authority powers to remove such material at the expense of the party responsible. Therefore, best practical means shall be taken at all times to ensure that all vehicles leaving the site during construction of the development and use thereafter are in a condition such as not to emit dust or deposit mud, slurry or other debris on the highway. Further information is available by telephoning 0300 1234047.

8. There are public sewers crossing or close to your development. If you're planning significant work near our sewers, it's important that you minimize the risk of damage. We'll need to check that your development doesn't limit repair or maintenance activities, or inhibit the services we provide in any other way. The applicant is advised to read our guide working near or diverting our pipes. <https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/working-near-our-pipes>

As you are redeveloping a site, there may be public sewers crossing or close to your development. If you discover a sewer, it's important that you minimize the risk of damage. We'll need to check that your development doesn't limit repair or maintenance activities, or inhibit the services we provide in any other way. The applicant is advised to read our guide working near or diverting our pipes. <https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/working-near-our-pipes>

With regard to water supply, this comes within the area covered by the Affinity Water Company. For your information the address to write to is - Affinity Water Company The Hub, Tamblin Way, Hatfield, Herts, AL10 9EZ - Tel - 0845 782 3333.

With regard to SURFACE WATER drainage, Thames Water would advise that if the developer follows the sequential approach to the disposal of surface water we would have no objection. Management of surface water from new developments should follow guidance under sections 167 & 168 in the National Planning Policy Framework. Where the developer proposes to discharge to a public sewer, prior approval from Thames Water Developer Services will be required. Should you require further information please refer to our website. <https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/working-near-our-pipes>

We would expect the developer to demonstrate what measures will be undertaken to minimise groundwater discharges into the public sewer. Groundwater discharges typically result from construction site dewatering, deep excavations, basement infiltration, borehole installation, testing and site remediation. Any discharge made without a permit is deemed illegal and may result in prosecution under the provisions of the Water Industry Act 1991. Should the Local Planning Authority be minded to approve the planning application, Thames Water would like the following informative attached to the planning permission: "A Groundwater Risk Management Permit from Thames Water will be required for discharging groundwater into a public sewer. Any discharge made without a permit is deemed illegal and may result in

prosecution under the provisions of the Water Industry Act 1991. We would expect the developer to demonstrate what measures he will undertake to minimise groundwater discharges into the public sewer. Permit enquiries should be directed to Thames Water's Risk Management Team by telephoning 020 3577 9483 or by emailing trade.effluent@thameswater.co.uk. Application forms should be completed on line via www.thameswater.co.uk. Please refer to the Wholesale; Business customers; Groundwater discharges section.

Notes:

Appeal to the Planning Inspectorate

If you are aggrieved by the decision of your local planning authority to refuse permission for the proposed development or to grant it subject to conditions, then you can appeal to the Secretary of State under section 78 of the Town and Country Planning Act 1990.

Before making any appeal you should first consider re-engaging with the local planning authority to discuss whether any changes to the proposal would make it more acceptable and likely to gain planning permission. A revised planning application could then be submitted.

Applicants should give consideration to the merits of the case, and whether there are strong grounds to contest the conditions or reasons for refusal of planning permission before submitting an appeal. Parties who pursue an appeal unreasonably without sound grounds for appeal may have an award of costs made against them.

Most planning appeals must be received within six months of the date on the decision notice. Where the appeal relates to an application for householder planning consent, and is to be determined via the fast track Householder Appeals Service, there are only 12 weeks to make the appeal. Appeals related to shop fronts must also be submitted within 12 weeks. Advertisement consent appeals must be submitted within 8 weeks. If an appeal on an application for planning permission is linked to enforcement action, there are only 28 days to make the appeal.

Appeals can be made online at: <https://www.gov.uk/planning-inspectorate>. If you are unable to access the online appeal form, please contact the Planning Inspectorate to obtain a paper copy of the appeal form on telephone: 0303 444 5000.

Compensation

In certain circumstances, compensation may be claimed for the Borough Council if permission is refused, or granted subject to conditions, by the Secretary of State on appeal or on reference of an application to him. These circumstances are set out in Parts VI and VIII and related provisions of the Town and Country Planning Act 1990 and Part 1 Chapter III of the Planning (Listed Buildings and Conservation Areas) Act 1990.

Purchase Notices

If either the Local Planning Authority or the Secretary of State refuses permission/consent to develop land, or grants it subject to conditions, the owner may claim that he can neither put the land to a reasonably beneficial use in its existing state, nor render the land capable of a reasonably beneficial use, by the carrying out of any development or works that have been or would be permitted.

In these circumstances, the owner may serve a purchase notice on the Borough Council. This notice will require the Council to purchase his interest in the land in accordance with the provisions of Part VI, Chapter I of the Town and Country Planning Act 1990 and Part I, Chapter III of the Planning (Listed Buildings and Conservation Areas) Act 1990.

Community Infrastructure Levy (CIL)

Dacorum Borough Council is a Charging Authority for Community Infrastructure Levy (CIL). It is your responsibility to clarify the CIL liability on your development. The Council will make every effort to ensure that notices for liable developments are dispatched as soon as possible following planning permission or consent being granted. If you do not receive a liability notice please contact the Council. It is important that all CIL matters be in place before any works begin on site – including any demolition. Further information regarding CIL, including FAQs, access to all CIL forms and information on appeals can be found on our website at www.dacorum.gov.uk/cil or you can contact us at CIL@dacorum.gov.uk.

Building Regulations

The proposed works may require building regulations approval. Please contact Hertfordshire Building Control who can help you through the process. They can be contacted via telephone (01438 879990) or email (buildingcontrol@hertfordshirebc.co.uk).

Creating New Addresses

If you are creating a new commercial or residential postal address, you must notify the Council's Address Management Team when works are commenced. This can be done [online](#) or by emailing address.management@dacorum.gov.uk.

Pollution Act

When arranging building works both the employer and the builder are responsible for works being undertaken within the hours of construction of the Control of Pollution Act 1974. Further information can be found on our [website](#).

Southern Gas Network Overbuild Advisory Note

There are a number of risks created by built over gas mains and services; these are:

- Pipework loading – pipes are at risk from loads applied by the new structure and are more susceptible to interference damage.
- Gas entry into buildings – pipework proximity increases risk of gas entry in buildings. Leaks arising from previous external pipework able to track directly into main building from unsealed entry.
- Occupier safety – lack or no fire resistance of pipework, fittings, or meter installation. Means of escape could be impeded by an enclosed meter.

Please note therefore, if you plan to dig, or carry out building work to a property, site, or public highway within Southern Gas Network's gas network, you must:

1. Check your proposals against the information held at <https://www.linesearchbeforeudig.co.uk/> to assess any risk associated with your development and
2. Contact their Plant Protection team to let them know. Plant location enquiries must be made via email, but you can phone us with general plant protection queries. See contact details below:

Phone 0800 912 1722 / Email plantlocation@sgn.co.uk

In the event of an overbuild on our gas network, the pipework must be altered, you may be temporarily disconnected, and your insurance may be invalidated.

Further information on safe digging practices can be found here:

- Our free Damage Prevention e-Learning only takes 10-15 minutes to complete and highlights the importance of working safely near gas pipelines, giving clear guidance on what to do and who to contact before starting any work <https://www.sgn.co.uk/damage-prevention>
- Further information can also be found here <https://www.sgn.co.uk/help-and-advice/digging-safely>
